JAMBO ATHLETIC

OUR STORY

Jambo Athletic is a family-owned company with its roots based in Bydgoszcz, Poland. The company was founded by me and my two brothers after our American football team faced major difficulties accessing reasonably-priced field equipment. Seeing that there were no European field equipment suppliers on the market, we came up with a strategy for designing the equipment ourselves. Once production began, Jambo Athletic field equipment was quickly in high demand from teams across the whole European continent. Since 2013 we do our best to improve players safety and preparation as well as leverage progress of team's sport program. Our company believes in developing American football in Europe, and we play our part by providing European teams with access to reasonably-priced field equipment.

Jambo Athletic provides highest quality design and manufacturing. We take great pride in what we do, and that is evident in the positive feedback from our clients. Since all our products are manufactured within Europe, shipping costs are relatively low and all countries within the European Union don't need to pay import taxes.

We share your passion for American football and want to help your team reach its goals, as emphasized in our company motto: "From Passion to Perfection.". All that makes Jambo Athletic the leader in American football training equipment for the European market.

Our superior quality has been already checked and confirmed by over 600 teams from 21 countries!

You need to give it a try yourself!

Best Regards

Jakub Sptocharski

Chief Executive Officer of JAMBO Athletic

BLOCKING SLED

JAMBO BLOCKING SLED

MEASUREMENTS

- Heights: 130 cm • Length: 288 cm • Width: 119 cm • Weight: 145 kg
- Options of use: MOB/LEV Defense/Offence
- Safe for artificial turf
- Jambo Blocking Sled Pad in Premium Quality Line Option
- Coaching platform with handle available on Customer request

Jambo Blocking Sled is designed to simulate heavy and repetitive contact at the line of scrimmage. The unique spring action, correct pad angle, and modular versatility help players take the next step in the development of blocking skills. Sleds are also fantastic tools to be used in the conditioning of defensive and offensive linemen.

Our sleds are easy to assemble and dismantle using only a few screws and it comes with an easy to understand manual. The unique design of Jambo Blocking Sled ensures lasting durability of the product and it allows the device to be used for both offensive and defensive line formations. The adjustment between two options can be made by pulling a simple lever.

Jambo Blocking Sled is also designed for combining several units together into larger chains of 2, 3, 4, 5-man-sleds. The units can just as easily be disconnected again to form individual units. No other sled is as versatile and diversely useful as ours.

Jambo Blocking Sled displays all necessary warning signs in potential hazardous areas that could cause potential injuries in case of misuse.

POP UP DUMMY

69

MEASUREMENTS

- Size: • 160x60
- Weight: • 55 kg
- Comeback system for quick position reset
- Safe for artificial turf
- Jambo Blocking Sled Pad in Premium Quality Line Option

Jambo Pop Up Dummy is an American football training tool designed to safely provide full extension on tackling drills while allowing repetitive tackles without the need to reset the bag. Upon contact, the pop-up dummy immediately returns to its upright position. The weighted, yet balanced base ensures that the dummy will always pop straight back up after contact.

Pop up dummies are also great for teaching pass rush drills and can be used to enhance agility drills.

Pop Up and Tackle Sled are the best training devices to practice full speed tackling technique.

POP UP DUMMY HANDS

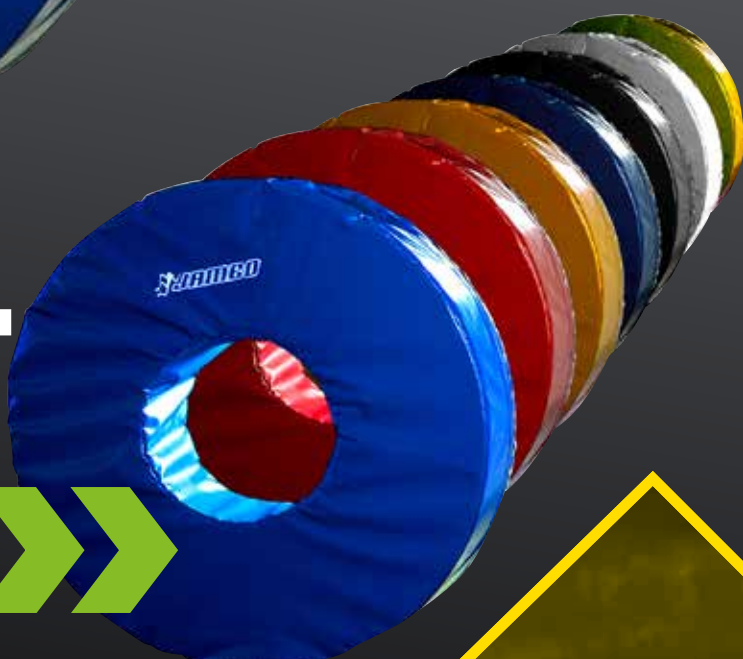

- Available only In black color
- Flex strap for ball carrying

JAMBO Pop Up Dummy Hands' purpose is to better imitate the opponent your players will face on the field. They are fastened with heavy duty D-strings and have a special strap, where you can place the football, so your players can go for a fumble during drills.

TACKLE DONUT

- Size: • 100x20 • 120x20
- Quality Line Options: Premium/Economy

Jambo Tackle Donut is a revolutionary American football training tool that improves mobile tackling technique. The unique round shape allows both coaches and players to roll the tackle donut to create a moving target. This feature is essential for teaching correct head placement throughout the duration of tackle and it can be done with no need of your players to collide.

SAFETY FIRST!

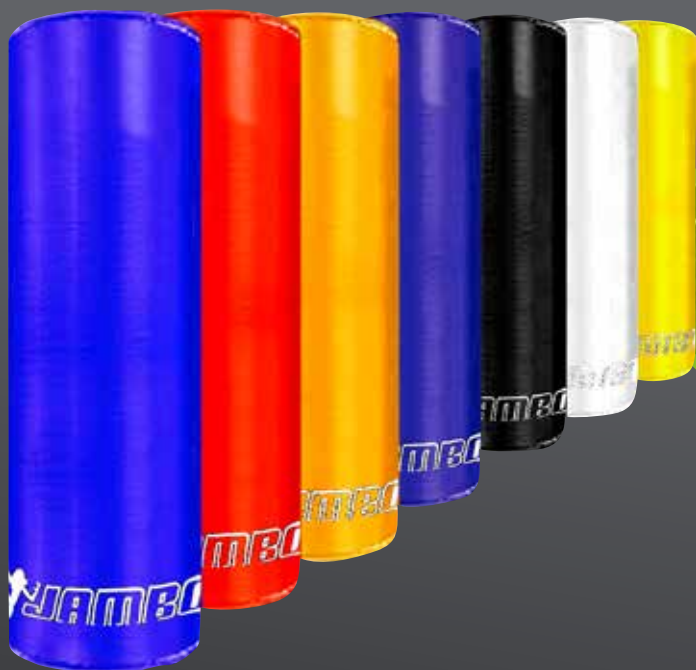

STEP OVER BAG

- Size: • 120x40 • 25x20
- QualityLine Options: Premium/Economy
- Set of handles that allow you to use the item as a blocking shield

Jambo Step Over Bag is an essential training tool for any American football team. Ours are specifically designed to improve player quickness, agility, balance, and coordination. They are perfect for both offensive and defensive drills, as well as for team warm-ups. Jambo Step Over Bags are the most necessary part of any field equipment set.

TACKLE DUMMY

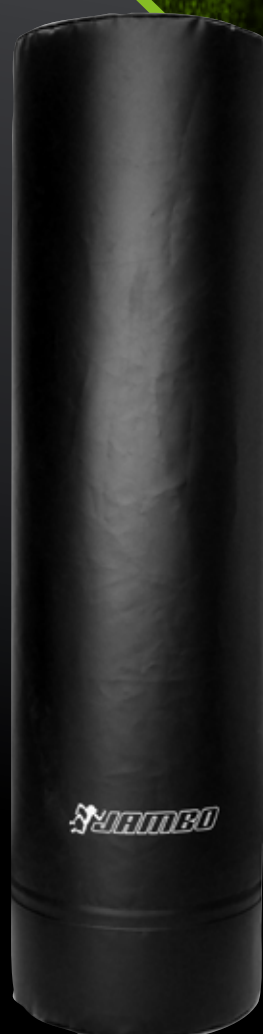

- Size: • 150x40 • 170x40 cm
- Cylinder shape with the base of a circle
- Quality Line Options: Premium/Economy
- Set of handles that allow you to use the item as a blocking shield

Jambo Tackle Dummy is an American football training tool which allows coaches to effectively teach proper tackling and blocking technique. The designed base allows the dummy to stand without being held. It is perfect for players working on improving their tackling power. Tackle dummies are an essential part of any field equipment set.

HEAVY TACKLE DUMMY

- Size: • 150x40
- Weight: • 37kg
- Cylinder shape with the base of a circle
- Set of handles that allow you to use the item as a blocking shield
- Heavy Tackle Dummy in Premium Quality Line Option

SHIELDS

HAND SHIELD

- Sizes: • 75x35x15 • 90x45x15
- Shapes: Rectangular/ Curved
- Jambo Hand Shields come only in Premium Quality Line Option

JAMBO Hand Shield is specially designed to facilitate the teaching of effective blocking and tackling technique. It allows players to mimic contact and therefore simulate real game action scenarios. The large striking area allows more intense contact during various drills. Hand Shields are an essential part of any field equipment set.

ARM PADS

- Jambo Arm Pads come only in Premium Quality Line Option
- Available only In black color
- They are sold in pairs

JAMBO Arm Pads will allow you to simulate live movement safely. Coach slides arm inside cylindrical shape of product to practice all hand combat moves using live motions..

HANDFREE SHIELD

- Jambo Arm Pads come only in Premium Quality Line Option
- Corpus like shape for proper hand positioning

JAMBO Handfree Shield is an unique type of shield that doesn't require players to hold the bag! It allows a complete use of arms and hands during drills, that provides a more realistic and full speed defensive reaction! Defenders can fight through blocks with their hands or drop into pass coverage.

It is a great tool to teach your players properly aim their blocks, place hands and deliver a blow that will come effective during gametime.

LINEMAN SKILL BALL

- Weight: • 5kg • 10kg
- Jambo Skill balls come only in Premium Quality Line Option
- Available only In black color

Proper joint centration is one of the most important in offensive line play. Lineman skill balls have been designed to not only create the feel of striking an actual opponent, it forces the player in to a more bio-mechanically advantageous position throughout the shoulders, elbows and wrists thanks to its shape.

O/D LINE-UP MARKER

- Lengths 8 meters
- Adjustable position markers to enable any size of gap

JAMBO O/D Line-up marker is a great aid to teach your players fundamentals of line-up techniques, so they can setup correctly every time they are on the field.

LANDING MAT

- Size: • 200x120x10 • 200x120x5
- Quality Line Options: Premium/Economy
- Additional velcros for connecting mats available

Jambo Landing Mat is an American football training tool designed to provide players with a safe landing during kick blocking drills, tackling drills, and any other practice that results in a hard landing for players. It functions as a crash pad so that players can practice the same drill repetitively and get full extension without the risk of injury. Our landing mats can quickly and easily be attached together to form various shapes, such as large squares, rows, "Ls" or any other. No other landing mats have such diverse utility.

EQUIPMENT BAGS

- Sizes: • Standard 70x40x40 • Big 85x50x50 • Player 80x40x40

Jambo Equipment Bags are a heavy-duty and extremely good quality carry bags. They are specifically designed to transport heavy American football equipment. We offer the following 3 variations: Standard and Big Equipment Bags: great for storing cones, balls, pumps, flags and any other team gear that gets easily misplaced, as well as Player Equipment Bag: comfortably fits a full set of player equipment, including one helmet, one pair of shoulder pads, one pair of cleats, one uniform, one set of leg pads and one football.

GOAL POST PADS

- Size: • 200x35 • 200x25
- Quality Line Options: Premium/Economy
- Shapes: Oval Premium / Square Economy
- Premium Option: available with full Personalization

Jambo Goal Post Pads create a protective barrier around any field goal post you have on your practice or game field. It is designed to protect players in case of colliding with a goal post. It is also a piece of equipment that you display on game days, so it is worth putting your team logo on it! Goal Post Pads are an essential part of any American football equipment set. Safety first!

FIELD PYLONS

JAMBO Field Pylons will make your gridiron look professional while conforming with your league standards. They are available in sets of four. They come only in orange color and have a regulation height of 18 inches. Weighted base keeps the pylons in upward position.

CHAIN SET & DOWN INDICATOR

Jambo Chain Sets & Down Indicators are essential for game days. These are extremely expensive to ship from the United States because of their large and non-traditional shape. Ours are extremely good quality and they are shipped from within Europe. This means that the Jambo Chain Set & Down Indicator is a no-brainer!

TACKLE SLED

MEASUREMENTS

- Heights: 184 cm • Length: 270 cm • Width: 106 cm • Weight: 110 kg
- Built-in mechanism absorbing energy of the hits
- Comeback system for quick position reset
- Safe for artificial turf
- Jambo Tackle Sled Pad in Premium Quality Line Option

JAMBO Tackle Sled is a practice aid designed to imitate full contact tackling – teach your players how to attack the opponent, wrap-up, drive back and bring them to the ground more effectively.

Heavy frame made of steel and padded bag will reflect the task of tackling a player better than any tackle dummy you may have on your site. The built-in mechanism will absorb the impact of the hit and require player to wrap the bag up and drive the sled to the ground. Once tackled, the sled will rebound to the upward position itself, so it can be used again.

Our sleds are easy to assemble and dismantle using only a few screws and it comes with an easy to understand manual.
